

ARRAYS 2

[Change Theme](#)

Language Python 3

Problem

The merged array should also be sorted in non-decreasing order. Complete the function `mergeSortedArrays` that takes the following parameters:

`int arr1[n]`: the first sorted array `int arr2[m]`: the second sorted array
Returns `int[]`: the merged sorted array

Submissions

Input Format

The first line contains an integer n , the size of the first array.
The second line contains n space-separated integers representing the first sorted array. The third line contains an integer m , the size of the second array. The fourth line contains m space-separated integers representing the second sorted array.

Leaderboard

Constraints

$1 \leq n, m \leq 10^5$ $-10^9 \leq arr1[i], arr2[i] \leq 10^9$ Both arrays are sorted in non-decreasing order.

Output Format

Print the merged sorted array as space-separated integers.

Discussions

Sample Input 0

```
4
1 3 5 7
4
2 4 6 8
```

Sample Output 0

```
1 2 3 4 5 6 7 8
```

```
1 n1 = int(input())
2 arr1 = list(map(int, input().split()))
3 n2 = int(input())
4 arr2 = list(map(int, input().split()))
5 i = 0
6 j = 0
7 merged = []
8 while i < n1 and j < n2:
9     if arr1[i] <= arr2[j]:
10         merged.append(arr1[i])
11         i += 1
12     else:
13         merged.append(arr2[j])
14         j += 1
15 while i < n1:
16     merged.append(arr1[i])
17     i += 1
18 while j < n2:
19     merged.append(arr2[j])
20     j += 1
21 print(*merged)
```
